

# The quintessence of Radio

The creativity of classic circuits  
perfected with modern know-how.

## EternalArts DVB-S Tube Audio Satellite Tuner DT

Radio at its top evolutionary stage. The most modern and demanding Tuner concept in combination with a classic cathode follower tube output stage. Never has radio been so rich and fascinating.

Technical Data	
Sample Rate Converter, D/A-converter	inertia divergent
Satellite system	Single LNB, preset to Astra 19,2°
D/A-converter	Multibit 24 bit 192 kHz for a multitude of resolutions and sampling rates
Tube output stage	2 x PC86 on double layer PCB and 70µ gold plated tracks
Frequency response	33 - 24.000 Hz +/- 0,5 dB
Signal-to-noise ratio (unweighted)	> 100 dB
Crosstalk	> 100 dB
THD	< 0,4 % (at nominal power)

(Subject to change without notice.)
